## **Introduction**

The State Classifier of the professions of workers and positions of employees in primary vocational education of Turkmenistan is an integral part of the Unified System of Classification and Coding of Technical, Economic and Social Information.

The need to develop this classifier is due to amendments to the regulatory framework in the field of primary vocational education. In accordance with the Law of Turkmenistan “On Education” (new edition), a classifier of professions of primary vocational education is being introduced, in which the training of qualified workers serving in primary vocational educational schools of Turkmenistan is being carried out (or may be carried out in future).

### **1 Area of application**

This standard determines the State Classifier of the profession of workers and positions of employees in primary vocational education of Turkmenistan (hereinafter referred to as the Classifier). The classifier is used in solving issues related to:

- regulation of admission, educational activities and graduation according to the educational programs of primary vocational education;
- determination of the need for personnel in the relevant professions of workers and positions of employees;
- regulation of statistical accounting in the field of primary vocational education.

### **2 Basic diagram of the code designation structure**

Specialties and areas of training are combined into enlarged groups. To generalize the characteristics of specialties and areas of training, enlarged groups are united in the field of education.

The classifier contains codes of fields of education, enlarged groups, specialties and areas of training, as well as their names.

The Classifier uses a hierarchical classification method and a sequential coding method.

The code designation of a specialty or area of training consists of seven digital characters:

X.XX.XX.XX, where:

The 1st digital character corresponds to the code of the field of education;

The 2nd and 3rd digital characters correspond to the enlarged group code;

The 4th and 5th digital characters correspond to the educational level code;

The 6th and 7th digital characters correspond to the code of the specialty or area of training.

After the code of the area of education, after the code of the enlarged group and after the code of educational level, a dot is put.

The code of the field of education, the code of the enlarged group and the code of educational level are sequential digital codes within the Classifier.

The code of specialty or area of training is a sequential digital code within the enlarged group and educational level.

When coding an enlarged group as an object of classification, the educational level code and the specialty code (direction of training) have the value “00”.

When coding the field of education as an object of classification, the code of the enlarged group, the code of educational level and the code of specialty (direction of training) have the value “00”.

In the Classifier the following list of areas of education is used:

1. Math and natural sciences
2. Engineering, technology and technical sciences
3. Healthcare
4. Agriculture and Agricultural Sciences
5. Social sciences
6. Education and pedagogical sciences
7. Humanities
8. Art and culture
9. Defense and security of the state. Military Sciences

In the Classifier the following list of enlarged groups is used:

- 1 MATHEMATICS AND NATURAL SCIENCES
  - 1.01 Mathematics and mechanics
  - 1.02 Computer and Information Sciences
  - 1.03 Physics and astronomy
  - 1.04 Chemistry
  - 1.05 Geosciences

- 1.06 Biological Sciences
- 2 ENGINEERING, TECHNOLOGY AND TECHNICAL SCIENCES
- 2.07 Architecture
- 2.08 Construction equipment and technologies
- 2.09 Informatics and Computer Science
- 2.10 Information Security
- 2.11 Electronics, radio engineering and communication systems
  
- 2.12 Photonics, instrumentation, optical and biotechnical systems and technologies
- 2.13 Electrical and thermal power engineering
- 2.14 Nuclear energy and technology
- 2.15 Mechanical engineering
- 2.16 Physical and technical sciences and technologies
- 2.17 Chemical technology
- 2.18 Industrial ecology and biotechnology
- 2.19 Technosphere safety and environmental management
- 2.20 Applied Geology, Mining, Oil and Gas Engineering and Geodesy
- 2.21 Materials technologies
- 2.22 Equipment and technologies of ground transport
- 2.23 Aviation, rocket and space technology
- 2.24 Air navigation and operation of aviation and rocket and space technology
- 2.25 Equipment and technologies of shipbuilding and water transport
- 2.26 Management in technical systems
- 2.27 Nanotechnology and nanomaterials
- 2.28 Textile and light industry technologies
- 3 HEALTHCARE
- 3.29 Fundamental medicine
- 3.30 Clinical medicine
- 3.31 Health Sciences and Preventive Medicine
- 3.32 General care
- 3.33 Pharmacy
- 4 AGRICULTURE AND AGRICULTURAL SCIENCES
- 4.34 Agriculture, forestry and fisheries
- 4.35 Veterinary and Animal Science
- 5 SOCIAL SCIENCES
- 5.36 Psychological Sciences
- 5.37 Economics and Management
- 5.38 Sociology and social work
- 5.39 Jurisprudence
- 5.40 Political sciences and regional studies
- 5.41 Mass media and information library business

- 5.42 Service and tourism
- 6 EDUCATION AND PEDAGOGICAL SCIENCES
- 6.43 Education and pedagogical sciences
- 7 HUMANITIES
- 7.44 Linguistics and literary study
- 7.45 History and archeology
- 7.46 Philosophy, ethics and religious studies
- 7.47 Theology
- 7.48 Physical Culture and sport
- 8 ARTS AND CULTURE
- 8.49 Art studies
- 8.50 Cultural studies and sociocultural projects
- 8.51 Performing Arts and Literary Creativity
- 8.52 Musical art
- 8.53 Fine and applied arts
- 8.54 Screen arts

The Classifier determines the educational level of primary vocational education:  
01 – primary vocational education – training of qualified workers and employees.

The classifier has been developed in accordance with the International Standard Classification of Education ISCED 2011 (Published in 2013 by the UNESCO Institute of Statistics. R.O. Box 6128 , Succursale Centre -Ville Montreal, Quebec H3C 3J7 Canada).

The following ISCED codes 2011 is assigned to each profession, specialty and area of training:

- code of educational program;
- code of the field of education.

### **3 Maintaining a classifier**

The Classifier is maintained in the following order:

#### **3.1 Ministry of Education of Turkmenistan:**

- prepares and approves a list of professions of workers and positions of employees in primary vocational education of Turkmenistan for each academic year in agreement with ministries and departments that have vocational and technical training schools;

- if necessary, prepares amendments and additions to the State Classifier;
- notifies users of this standard about amendments made, the procedure and term of their put into force.

3.2 The main state service “Turkmenstandartlary” approves and registers draft Classifiers and amendments to them.
